Participant Code replaces Lab Code.

Distribution details and report status.

The running table shows the current distribution PI scores, and ultimately the previous 5 distribution PI scores for all analytes, for your Participant Code, plus all-Participant Median performance.

Your % Poor PI (Performance Index) across all samples for all instruments, the Median All Participants % Poor PI and the 97.5th Centile % Poor PI.

The PI Scores table shows performance for all analytes and all instruments.

PI scores are converted into performance categories and colour coded.

Key for PI Codes.

Overall % Poor PI across all analytes for each instrument, and Overall % non return for each instrument.

PI Code	Meaning
N/A	Not enrolled for this analyte
NRR	Analyte enrolled but no results returned
N/S	This quantitative analyte not scored for this distribution

***** Please note********

The NQAAP expects 100% compliance on EQA returns. If you are enrolled for an analyte and have not returned a result (denoted by NRR in your PI table), this will be treated as a poor performance score. Please let us know as soon as possible if you are no longer providing this analyte as part of your diagnostic service.

'Your reported result' will be shown in the units entered, in the Weqas standard units (if units entered are different from the Weqas standard units), and method corrected result (if appropriate for the analyte).

This will show whether you have been scored against Reference Value, Method Mean or Overall Mean and the actual target value will be shown here.

Running Performance chart shows the PI (Performance Index) score for each sample for the current distribution and the last 5 distributions, with colour coding for each performance category.

Overall Performance is shown as a 'Traffic light', with performance colour coded to easily identify the performance category.

Running Performance

Bias (Absolute)
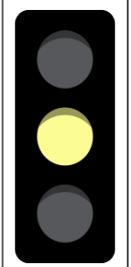

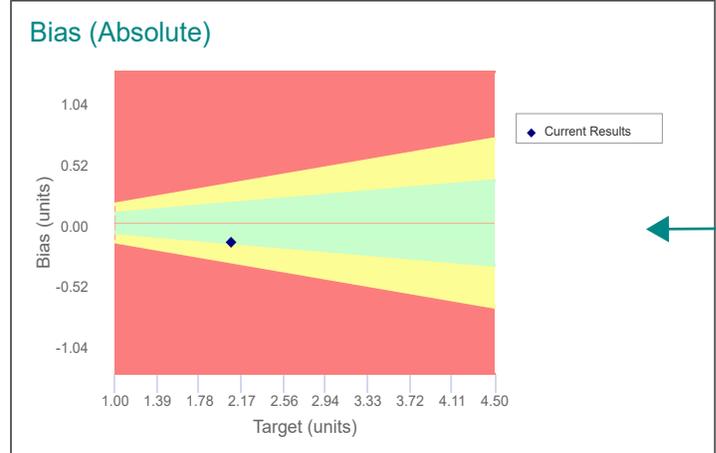

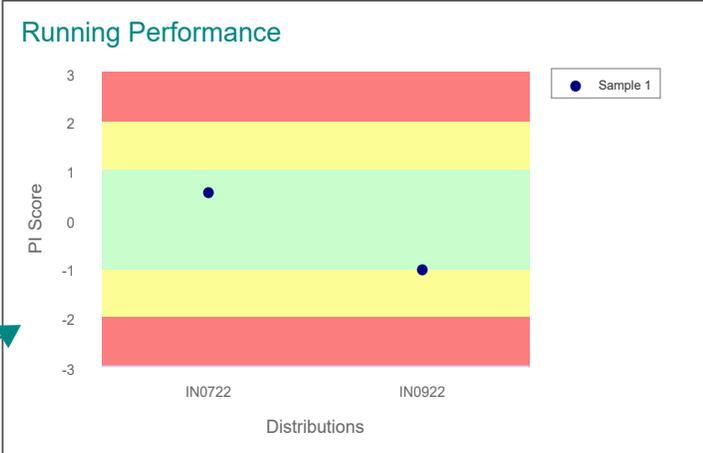

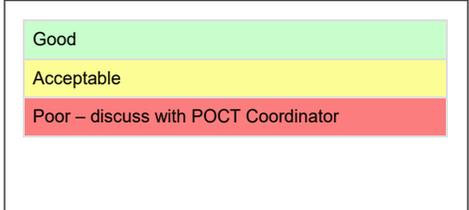

Your overall performance for this analyte is: Acceptable
- Your results for this distribution are acceptable

There are no Weqas or Participant supplied comments for INR for this distribution.

The individual Location and instrument details will be shown here.

The Bias (Absolute) Plot shows absolute bias in Weqas standard units for each sample for the current distribution. The x-axis is the target value; if the target value is a Reference Value or the Overall Mean, your Method Means will be plotted.

Overall Performance is stated here along with a basic interpretation of your performance and potential error identified.
